#### 16. DERIVATIVES FINANCIAL ASSETS/(LIABILITIES)

Financial derivatives are instruments whose values change in response to the change in one or more "underlying", such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Group and the Bank customise derivatives to meet specific needs of their customers. The Group and the Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Group and the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases, these other contracts are not designated in hedge relationships and are measured at fair value through profit or loss.

The fair values of the derivatives are as follows:

The table above analyses the principal amounts and the positive and negative fair values of the Group and Bank's financial derivatives. The notional amounts of these instruments indicate the volume of transactions outstanding at the reporting date for both trading and hedging instruments. They do not necessarily indicate the amount of future cash flows or the fair value of the derivatives and therefore, do not represent total amount of risk. The positive and negative fair values represent the favourable and unfavourable fair values respectively of hedging and trading derivatives as a result of fluctuations in the value of the underlying relative to their contractual terms as at reporting date.

#### 31. PERFORMANCE REVIEW

The Group recorded a pre-tax profit of RM695.5 million for the half year ended 30 Jun 2014, an increase of RM22.2 million as compared to the corresponding period last year. The better performance was mainly on the back of higher total income, lower impairment loss on AFS securities and higher share of net profit of associates; but partially offset by higher other operating expenses and higher allowance for impairment on loans and advances.

Net interest income grew by RM89.6 million or 11.8% to RM847.1 million mainly driven by loans growth. Other operating income reduced by RM5.2 million or 1.5% to RM347.1 million mainly contributed by lower trading and investment income but moderated by higher fee income.

Total operating expenses increased by RM84.2 million or 22.0% to RM466.9 million as we continued investing in our people and infrastructure to support business growth. Expense to income ratio stood at 39.1%.

Allowance for impairment on loans and advances increased by RM27.6 million or 41.2% to RM94.5 million from higher individual impairment and collective impairment. There are a few cases of new non-performing loans but these are not seen to be reflective of overall portfolio strength. Asset quality remained healthy with the net non-performing loans ratio at 1.3%.

Gross loans increased by RM2.3 billion or 3.6% to RM64.6 billion as at 30 June 2014 while non bank deposits increased by RM0.4 billion or 0.5% to RM69.7 billion.

#### 32. PROSPECTS FOR 2014

The global economy is expected to continue its recovery, with moderate expansion of economic activity in the advanced economies. This is supporting growth in Asia while domestic demand continue to expand.

For the Malaysian economy, favourable conditions are supporting domestic demand and boosting exports as well as investment activities by the private sector. The new level of Overnight Policy Rate (OPR), as announced by Bank Negara Malaysia on 10 July 2014, is not expected to significantly impact the economy.

The Group will continue to look for opportunities to strengthen its product and fee generating capabilities to provide relevant solutions to customers.

The Group continues to be cautiously optimistic to achieve a satisfactory result in 2014.
