16. DERIVATIVES FINANCIAL ASSETS/(LIABILITIES)

Financial derivatives are instruments whose values change in response to the change in one or more "underlying", such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Group and the Bank customise derivatives to meet specific needs of their customers. The Group and the Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Group and the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases, these other contracts are not designated in hedge relationships and are measured at fair value through profit or loss.

The fair values of the derivatives are as follows:

	G	Group and Bank

The table above analyses the principal amounts and the positive and negative fair values of the Group and Bank's financial derivatives. The notional amounts of these instruments indicate the volume of transactions outstanding at the reporting date for both trading and hedging instruments. They do not necessarily indicate the amount of future cash flows or the fair value of the derivatives and therefore, do not represent total amount of risk. The positive and negative fair values represent the favourable and unfavourable fair values respectively of hedging and trading derivatives as a result of fluctuations in the value of the underlying relative to their contractual terms as at reporting date.

31. PERFORMANCE REVIEW

For the nine months ended 30 September 2014, the Group recorded a pre-tax profit of RM1,109.2 million, an increase of RM95.0 million or 9.4% higher as compared to the corresponding period last year. The better performance was mainly on the back of higher total income, lower impairments and higher share of net profit of associates, partially offset by higher other operating expenses.

Net interest income increased by RM164.8 million or 14.3% to RM1,318.7 million, supported mainly by loans growth. Other operating income fell by RM8.1 million or 1.5% to RM534.6 million mainly due to lower gain on foreign exchange, lower trading and investment income, partially offset by higher fee income.

Total operating expenses increased by RM124.9 million or 21.6% to RM702.0 million as we continued to invest in people and infrastructure.

Allowance for impairment on loans and advances decreased by RM11.2 million or 8.2% to RM125.8 million mainly contributed by lower collective impairment, partially offset by higher individual impairment. Asset quality remained sound with the net non-performing loans ratio at 1.3%.

As at 30 September 2014, gross loans increased by RM3.9 billion or 6.2% to RM66.2 billion while non-bank deposits increased by RM1.6 billion or 2.3% to RM70.9 billion.

32. PROSPECTS FOR 2014

The global economy is expected to grow at a moderate pace, with ongoing economic recovery seen in some advanced economies benefitting international trade activities. Uncertainty over policy changes in key economies and geopolitical risks continue to be a concern.

The Malaysian economy is expected to remain on a steady growth path with private sector activity as the key driver of growth. Export growth is expected to moderate slightly in the second half of the year, although this will be supported by the recovery in the advanced economies and regional demand.

The Group continues to target to achieve a satisfactory set of results for 2014.
