16. DERIVATIVES FINANCIAL ASSETS/(LIABILITIES)

Financial derivatives are instruments whose values change in response to the change in one or more "underlying", such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Group and the Bank customise derivatives to meet specific needs of their customers. The Group and the Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Group and the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases, these other contracts are not designated as hedge relationships and are measured at fair value through profit or loss.

The table above analyses the principal amounts and the positive and negative fair values of the Group and the Bank's financial derivatives. The notional amounts of these instruments indicate the volume of transactions outstanding at the reporting date for both trading and hedging instruments. They do not necessarily indicate the amount of future cash flows or the fair value of the derivatives and therefore, do not represent total amount of risk. The positive and negative fair values represent the favourable and unfavourable fair values respectively of hedging and trading derivatives as a result of fluctuations in the value of the underlying relative to their contractual terms as at reporting date.

21. SUBORDINATED BONDS (cont'd.)

(a) The interest is payable semi-annually in arrears on 28 February and 30 August each year commencing 28 February 2014.

The Bonds 1 qualify as Tier 2 capital for the purpose of determining the Bank's capital adequacy ratio.

(b) On 8 May 2015, the Bank issued RM1.0 billion Basel III compliant Tier 2 subordinated bonds (10 years maturity, non-callable 5 years) ("the Bonds 2").

The Bonds 2 bear interest at the rate of 4.65% per annum. The coupon rate herein is applicable throughout the tenure of the subordinated bonds.

The Bonds 2 may be redeemed at par at the option of the Bank, in part or in whole, on 8 May 2020 or at any interest payment date thereafter.

As at 31 March 2017, the Bank had an interest rate swap agreement in place with notional amount of RM500 million (2016: RM500 million) whereby the Bank receives a fixed interest rate of 4.65% per annum and pays variable interests rate of KLIBOR 6M plus 0.590% to 0.725% on the notional amount. The swap is being used to hedge exposure to changes in fair value of fixed rate of the Bonds 2.

The movement in fair value of the interest rate swap of RM584,367 (2016: RM4,057,000) are recognised in trading and investment income during the year. There is no ineffectiveness recognised for this hedge.

31. PERFORMANCE REVIEW

For the financial period ended 31 March 2017, the Group delivered a profit before taxation of RM383.9 million, an increase of RM7.4 million or 2.0% compared to same period last year. The increase in profit is mainly from higher operating income coupled with higher net interest income, partially offset by higher other operating expenses and allowance for impairment on loans and advances.

Net interest income rose 1.6% or RM8.0 million to RM498.7 million due to higher interest income from customer loans coupled with interest income from available-for-sale securities, partially offset by higher interest expenses from customer deposits and lower interest income from financial assets at fair-value-through-profit-or-loss.

Other operating income rose 6.2% or RM12.7 million to RM215.4 million primarily due to increase in fee income; and trading and investment income, partly offset by lower foreign exchange gain. Net income from Islamic Banking business was recorded at RM3.7 million.

Expenses increased by 4.4% or RM10.8 million to RM259.0 million, largely contributed by higher staff expenses and establishment related expenses. Expense-to-income ratio was 36.1% as we continued investments in building bench strength, infrastructure and technology to sharpen our capabilities.

Allowance for impairment on loans and advances increased by RM7.1 million to RM75.9 million mainly contributed by higher collective impairment of RM9.2 million, partially offset by lower individual impairment of RM2.1 million. Asset quality remained sound with net non-performing loans ratio stable at 1.3%.

EXPLANATORY NOTES

32. PROSPECTS FOR 2017

Global conditions have showed signs of improvement. Trade volumes are expanding, confidence levels rising, and economies are benefiting from stronger external demand. Nevertheless, there are risks to global growth from protectionism, geopolitical developments, heightened volatility of financial markets and negative developments for commodities.

Despite the fragile external environment, Malaysia's economic growth has held above 4.0%. Economic indicators have improved since November last year with exports rebounding to double-digit growth and resilient manufacturing output over 4.0% buoyed by higher export orders. While domestic demand is facing headwinds from higher costs and inflation pressures, there has been a raft of domestic support measures to cushion household spending. Private consumption will be supported by positive wage adjustments for minimum wages, civil servant salaries and higher government cash-handouts.

Bank Negara Malaysia (BNM) has kept interest rates on hold and signaled that the current level of interest rate is appropriate based on present economic conditions. Generally all key sectors are expected to expand this year aided by fiscal support measures, infrastructure projects, and accommodative monetary policy.

Notwithstanding the challenging economy outlook, the Group will continue to build on its strengths, invest in capabilities to serve its customers' needs and remain committed to delivering sustainable value for our shareholders.

The group is expected to achieve satisfactory set of result in 2017.
