EXPLANATORY NOTES

18. DERIVATIVE FINANCIAL ASSETS/(LIABILITIES)

Financial derivatives are instruments whose values change in response to the change in one or more "underlying", such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Group and the Bank customise derivatives to meet specific needs of their customers. The Group and the Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Group and the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases for customers, these other contracts are not designated as hedge relationships and are measured at fair value through profit or loss.

The fair values of the derivatives are as follows:

	Group and Bank

The table above analyses the principal amounts and the positive and negative fair values of the Group's and the Bank's financial derivatives. The notional amounts of these instruments indicate the value of transactions outstanding at the reporting date for both trading and hedging instruments. They do not necessarily indicate the amount of future cash flows or the fair value of the derivatives and therefore, do not represent total amount of risk. The positive and negative fair values represent the favourable and unfavourable fair values respectively of hedging and trading derivatives as a result of fluctuations in the value of the underlying relative to their contractual terms as at reporting date.

(a) On 25 July 2018, the Bank issued RM600 million Basel III compliant Tier 2 subordinated bonds (10 years maturity, non-callable 5 years) ("the Bond 1").

The Bond 1 bears interest at the rate of 4.80% per annum. The coupon rate herein is applicable throughout the tenure of the subordinated bonds.

The Bond 1 may be redeemed at par at the option of the Bank, in part or in whole, on 25 July 2023 or at any interest payment date thereafter.

The interest is payable semi-annually in arrears on 25 January and 25 July each year commencing 25 January 2019.

The Bond 1 has been rated AA1 by Rating Agency Malaysia Bhd and it qualifies as Tier 2 capital for the purpose of determining the Bank's capital adequacy ratio.

(b) On 3 August 2020, the Bank issued RM750 million Basel III compliant Tier 2 subordinated bonds (10 years maturity, non-callable 5 years) ("the Bond 2").

The Bond 2 bears interest at the rate of 3.00% per annum. The coupon rate herein is applicable throughout the tenure of the subordinated bonds.

The Bond 2 may be redeemed at par at the option of the Bank, in part or in whole, on 1 August 2025 or at any interest payment date thereafter.

The interest is payable semi-annually in arrears on 3 February and 3 August each year commencing 3 February 2021.

The Bond 2 has been rated AA1 by Rating Agency Malaysia Bhd and it qualifies as Tier 2 capital for the purpose of determining the Bank's capital adequacy ratio.

(c) Fair value hedge

The Bank uses fair value hedge to protect changes in fair value of the Bond 1. The Bank primarily uses interest rate swap as hedge of interest rate risk.

As at 30 June 2021, the Bank had an interest rate swap agreement in place with notional amount of RM600 million (31 December 2020: RM600 million) for Bond 1.

For Bond 1, the Bank receives a fixed interest rate of 3.835% per annum and pays variable interests rate of 3-month KLIBOR on the notional amount.

The swap is being used to hedge exposure to changes in fair value of fixed rate of both bonds, which have a fixed rate.

The movements in fair value of the interest rate swap of unrealised loss of RM7,355,000 (31 December 2020: RM14,946,000 unrealised loss) are recognised in trading and investment income during the period. There is no ineffectiveness recognised for this hedge.

35. PERFORMANCE REVIEW

For the six months ended 30 June 2021, the Group recorded a profit before taxation of RM882.5 million, an increase of 4.5% or RM38.4 million compared to same period last year. The increase was due to higher operating profit and lower total allowances for expected credit losses.

Total operating income increased by 2.1% or RM34.6 million to RM1,655.9 million from higher net interest income and net income from Islamic Banking operations, offset by lower other operating income. Other operating income decreased 20.8% or RM103.3 million to RM393.8 million mainly due to higher trading and investment income in prior year and lower net foreign exchange gain, partly offset by higher fee income.

Expenses increased by 0.4% or RM2.7 million to RM626.2 million driven by higher investment in information technology cost, partly offset by lower staff expenses as well as promotion and marketing related expenses.

Total allowance for expected credit losses decreased by RM6.5 million mainly due to lower expected credit loss on loans, advances and financing and other financial assets, partly offset by higher expected credit loss on commitments and contingencies.

36. PROSPECTS FOR 2021

Despite lingering uncertainties pertaining to the COVID-19 pandemic, the global economy is expected to return to growth in 2021 albeit mixed with growth differentiated across different economies and different sectors. On a positive note, successful vaccination programs and control of the pandemic alongside significant policy support could work to revive economies and undo some of the COVID-19 damage. On the downside, potential delays in vaccine distribution or lower effectiveness of vaccines against new virus variants could lead to persistence of infections and restrictions that could weaken the economic recovery. In any case, this crisis is considered different from past recessions in many ways and higher uncertainty surrounds the outlook with some countries and segments expected to experience deeper scars due to greater exposure to the pandemic shock.

A favourable financial climate thanks to the large and extraordinary global fiscal and monetary expansion has helped to support financial stability through the pandemic crisis. A consequence of the stimulus and vaccine driven outlook is that there are increasing concerns about higher inflation brought about by the expansive fiscal stimulus and ultra-accommodative monetary policies. The positive impact of these measures could be eroded by the resultant global financial tightening. Nevertheless, given that high uncertainty surrounds the global growth outlook and divergent recoveries are expected, we expect global policy support to remain accommodative until the recovery is firmly underway. Policymakers may start to tailor their policy responses differently according to the course of the pandemic, vaccine coverage, and pace of overall recovery.

We expect Malaysia's gross domestic product (GDP) to expand in 2021 in line with expectations for positive global growth albeit near term economic recovery to be affected by the resurgence in infections and tightened containment measures. The impact is expected to ease as the vaccination roll-out progresses to allow reopening of more economic and social sectors. Higher adoption of digitalisation since last year has facilitated more consumption and business activities. The government announced further assistance under the PEMULIH package worth MYR150bn. This brings cumulative assistance since 2020 to MYR530bn that was announced over eight fiscal packages. In addition, the banking sector has committed to help households and businesses who require assistance. The sizeable amount of assistance alongside ongoing monetary support will help to cushion somewhat the effects of the ongoing containment measures. However, given the fluid condition and pandemic uncertainties, downside risks prevail especially if there are delays in the vaccination roll-out and threat from new COVID-19 variants.

We expect the economy to recover once uncertainties related to COVID-19 abate. We remain optimistic that Malaysia's underlying strengths, including its strategic geographical location, significant natural resources, diversified economic structure, improved external position, favourable demographics, robust macro policies and resilient institutions will support the country's growth over the long term.

Amid challenging economic conditions, we continue to stay vigilant, nimble and focused on building the progressive solutions for our customers.

g. Financial Derivatives

Financial derivatives are instruments whose values change in response to the change in one or more "underlying', such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Bank customise derivatives to meet specific needs of their customers. The Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases for customers, these other contracts are not designated as hedge relationships and are measured at fair value through profit or loss.

The fair value of the derivatives are as follows:

As at 30 June 2021	Contract or underlying principal amount RM'000	Positive fair value RM'000	Negative fair value RM'000
