What is 3D Secure?

3D Secure (3DS) is a security protocol used by banks worldwide to authenticate online card transactions. You will recognise the participating 3DS merchants by the following logos on the merchants' websites:

How does it work?

- When you are making online purchases, you will be prompted to enter an OTP (One-Time Password) at the 3DS merchant's website to authenticate the transaction.
- This OTP will be automatically sent to your registered mobile phone number with the Bank.
- Once you have entered the OTP, you can proceed with your online purchase transaction.

One-Time Password (OTP) for your online purchases.

As an added security measure, you will be required to enter an OTP when you make online purchases at participating 3D Secure (3DS) merchants using your UOB credit or debit cards.

Who needs to register the mobile phone number for 3DS?

For existing UOB Personal Internet Banking (PIB) customers who receive One-Time-Password by SMS (SMS-OTP) on their mobile phones, NO further action is required as the 3DS password will automatically be sent to the SAME mobile phone number registered for PIB SMS-OTP.

If you have NOT registered for PIB SMS-OTP, you will need to register your mobile phone number with the Bank for transactions with 3DS merchants, regardless of whether you are the principal or supplementary cardmember. This is a one-time registration which will be applicable to ALL your UOB credit and debit cards.
